Machinery Overview
2023

We are NEDMACH machinery sales and manufacturing company saved hours of experiences in sheet metal machine industry and knows and understand customers expectations so to build machines according to these aspects .Nedmach guides its customer through the purchasing process that starts with the first step of finding the correct solution ,correct products and to the last step of installation,training. Aftersales services is also one of the important points that NEDMACH emphasis on

N-HIW 22

HYDRAULIC IRON WORKER

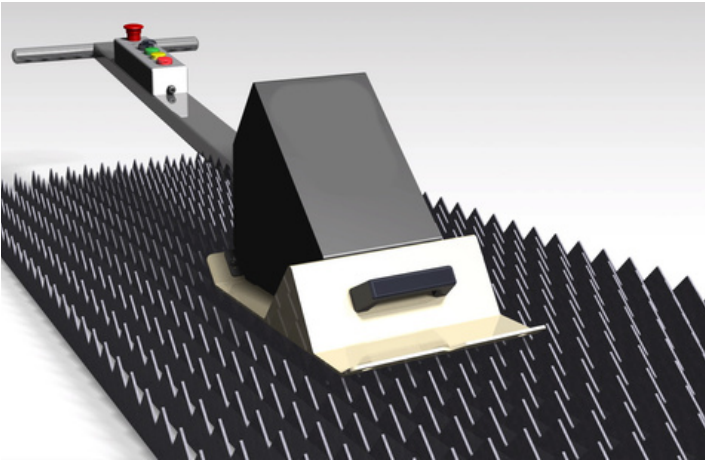

Angle Cutting	50x50x5 mm
Square Bar	14 mm
Round Bar	14 mm
Flat Sheet	10 mm
Blade Length	150 mm
Thickness	5 mm
Max Hole Ø	15 mm
Motor Power	3 kw 4 hp
Weight	150 kg

- * Monophase
- * Optional on wheels to be carried all over the workshop
- * Practical and Easy to Use
- * Universal Type Punches and Dies
- * Adjustment Mode
- * Compatible with CE Norms
- * Optional T Bar Cutting Blades

SLAT CLEANER FOR LASER CUTTERS

Suitable for all brands laser cutters

For use on most manufactures, such as Bystronic, Trumpf, Amada, Mitsubishi, Mazak and more, both CO2 and fiber type laser machines

Manual cleaning 180- 200 minutes average
Slate cleaning 30-40 minutes average
The average number of slats changes in manual cleaning is 3 – 4 time per year.
On average , once every 2 years with Slat Cleaner
Slats are damaged with manual cleaning
The life time of the slats are increase with Slate Cleaner
Regional slags remain in manual cleaning
Clean surface can be obtained with Slate Cleaner
In manuel cleaning , there is a high risk of injury by the operator falling.
No risk of injury with Slat Cleaner
In manuel cleaning , operators perform cleaning as late as possible

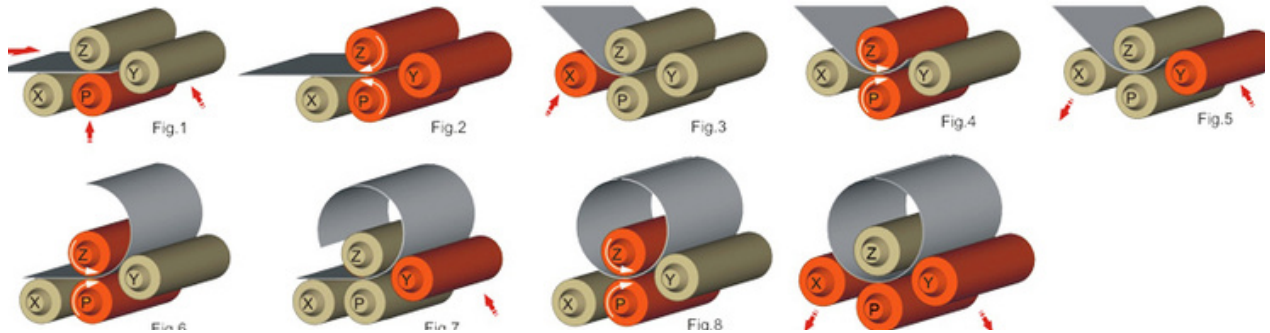

4 ROLL HYDRAULIC PLATE ROLLS NCB-H and NCB-E Series

4R NCB-H and NCB-E 4 Rolls Hydraulic Plate Rolling Machine are designed and engineered to perform rolling operations of steel ,stainless steel ,aluminum medium and heavy plates into ferrules,cones and varied radiuses shapes.

CNC-NC Controls are available together with optionals like Overhead Crane,Side Supports ,Accumulator ,Welding on Machine and others

Nedmach Plate Rolling Machines are suitable for bending light, medium and heavy plates, aluminum or stainless Steel for various diameters.

- *Steel welded heavy frame construction, stress relieved
- *Induction hardened rolls (SAE 1050-CK 45) are of high tensile carbon steel forgings, heat treated and submitted to non-destructive structure controls. For special requirements they can be supplied with surface polishing.
- *Conical bending device
- *Central lubrication system
- *Digital Read Outs in Standart
- *Hydraulic elements: Motor and pump group, pressure valves, selenoid valves, oil display and etc. Duplomatic (Italian) components used.
- *Emergency system: Safety string barrier around the machine and emergency push button
- *Electric equipments: Siemens (German) or Telemecanique (France)
- *Reducers BREVINI or COMER (Italian)
- *Built according to EC Safety Directives
- *Optional CNC and NC Control units for precise bending applications
- *Hydraulic Balance and Electronic Balance available standart or optional due to machine size

3 ROLL Motorised PLATE ROLLS NRM-S NRM and NM Series

NRM-S

Sheet metals, stainless and aluminum materials from 1050 mm to 3050mm in length, from 1 mm to 9mm in thickness in Conical and Cylinder bending operations are easily fulfilled with that 3 Roll Machine

Its powered by planetary gearbox so you can easily perform your operations.
